PROFESSIONAL SUMMARY

Senior 3D Character Artist creating realistic and stylized characters for PC and mobile games. Former Lead 3D Character Artist at Gameplay Galaxy, combining hands-on production with team guidance and art reviews. Work spans sculpting, clothing, grooming, retopology, UVs, PBR texturing and real-time optimization. I also develop Blender tools in Python and standalone software for character-art workflows.

PROFESSIONAL EXPERIENCE

Gameplay Galaxy — **Jan 2023 — May 2026**

Lead 3D Character Artist · Remote

- Led and mentored the character-art team, reviewed work and organized production workflows.
- Produced game-ready characters across sculpting, clothing, grooming, retopology, UVs and PBR texturing.
- Collaborated with concept, animation and engineering on character production and integration.

Fire Games Studios — **Jan 2022 — Feb 2023**

3D Artist / 3D Generalist · Remote

- Modeled and textured characters, props and environments for in-game use.
- Supported rigging, engine integration and generalist work for prototypes and indie productions.

Fiverr · Freelance — **Jan 2020 — May 2022**

3D Modeler · Remote

- Delivered custom 3D assets for international clients in games, AR/VR and animation.
- Adapted visual style and asset complexity to each project and target platform.

BeByte — **Sep 2017 — Feb 2022**

3D Generalist → Lead · Brasília · Hybrid

- Promoted from 3D Generalist to Lead after approximately three months.
- Produced modeling, texturing, rigging, animation and game-engine integration work.
- Guided artists and organized production workflows while remaining involved in asset delivery.

CORE SKILLS

Character art: Realistic and stylized characters, anatomy, digital sculpting, garment creation, cloth simulation, grooming and hard-surface props.

Production: Retopology, UV mapping, baking, PBR texturing, real-time optimization and engine integration.

Leadership: Team guidance, mentoring, production workflow organization and cross-functional collaboration.

Software: ZBrush, Blender, Maya, Substance 3D Painter, Marvelous Designer, Marmoset Toolbag, Photoshop and Python.

TECHNICAL TOOLS

I develop Blender add-ons in Python and standalone software for character production.

Iris Studio: Procedural eye creation with 3D preview, model and texture-map export.

Blender add-ons: Groomr - guide-driven hair cards; Stitchr - surface-aware seams and stitches; Weavr - procedural woven structures; Cuttr - surface cuts and panel details. Drawr - raised and engraved surface details.
